Dear A/Prof.Dr. Le Tien Dung,

Thank you very much for your cooperation.

Best Regards,

A/Prof. Nguyen The Vinh

On behalf of the Organizing Committee

The 8th Viet-Pol International Scientific Conference

From: Tien Dung Le <t.d.le@hug.edu.vn>

Subject: RE: Invitation to Review a Paper – VietPol2025 Conference

Dear the Viet-Pol Organizing Committee,

I have completed the reviewer reports for the assigned manuscripts, please see the files attached.

I noticed that the manuscript # 117 and manuscript #140 seems to be identical; the similar reports were prepared for them.

Thank you for the inviting me to review and I wish the conference every success.

Regards,
Dung.

Subject: Invitation to Review a Paper – VietPol2025 Conference

Dear A/Prof.Dr. Le Tien Dung,

On behalf of the VietPol2025 Conference Organizing Committee, I would like to invite you to review a paper that closely aligns with your area of expertise. Your deep knowledge in this field will provide valuable insights and constructive feedback for the author.

The paper is attached to this email for your interest. We kindly ask that you send your review by 30 August, 2025. However, you may accept and suggest an alternative completion date if needed.

I sincerely hope you will accept this invitation. In case you are unable to review the paper, I would greatly appreciate it if you could kindly recommend a suitable colleague(s) to perform this review.

Please disclose any potential conflicts of interest you might have concerning the manuscript's content or the authors.

The peer review note can be found in the attachment for your reference.

Many thanks for your time and consideration. I look forward to your feedback of this invitation.

REVIEWER COMMENTS

VIET-POL 2025 CONFERENCE

(First Assessment)

Article title: SIMULATION OF AIR TEMPERATURE CHANGES IN VIETNAMESE UNDERGROUND COAL MINES USING VENTSIM DESIGN SOFTWARE

Please use this guide to assist you in formulating your comments on the review form below:

(Please, double-click on one square for your selection)

1. Initial points to be considered:

- Does the subject fall within the scope of the journal? ☒ Yes ☐ No
- Is this a novel and original contribution? ☒ Yes ☐ No
- Are interpretations and conclusions sound, justified by the data, and consistent with the objectives? ☒ Yes ☐ No
- Is the material too clinical, too specialized, or too preliminary for our readership?
☐ Yes ☒ No

If your answer(s) to any of the above points suggests that the paper is not suitable for the journal, please give a clear argument for rejection on the review form:

2. If the paper is appropriate for review, then please consider the following:

- Does the title clearly reflect the contents? ☒ Yes ☐ No
Comment:
- Is the abstract sufficiently informative, suitable to appear on the journal? ☒ Yes ☐ No
Comment: Key results and contributions should be specifically mentioned.
Are keywords appropriate? ☒ Yes ☐ No
Comment:
- Is the statement of the article adequate and appropriate in view of the subject matter?
☒ Yes ☐ No
Comment:
- Is the description of materials and methods sufficiently informative to allow replication of the experiment? ☒ Yes ☐ No
Comment:
- Are the statistical methods used correct and adequate? ☐ Yes ☐ No
Comment: Not applicable.
- Are the results clearly presented? ☒ Yes ☐ No
Comment:

- Is the organization of the article satisfactory? ☒Yes ☐No

Comment:

- Does the content justify the length? ☒Yes ☐No

Comment:

- Are the figures, photos, and table all necessary, complete, and clearly presented?

☒Yes ☐No

Comment: There is polish within Fig.4—needs translation into English.

- Are the references adequate? ☒Yes ☐No

Comment: Some references are not in English—needs translation into English.

- Is the English correct and understandable to a multidisciplinary and multinational readership? ☒Yes ☐No

Comment:

3. Recommendation to the Editor:

- ☐ Acceptance with no revision
- ☒ Acceptance with minor revision
- ☐ Acceptance with major revision
- ☐ Rejection

Addition comment/guide to the author for:

Comment:

This paper explores the application of Ventsim desgin software to model and predict air temperature changes in longwall faces of Vietnam underground coal mining. The paper is well written, the structure is logical, and the results are deeply discussed. One major concern is that the results were apparently published in a previous work, and thus the current study should strongly highlight its conclusions and contribution.

Detailed comments for improving the quality of the paper can be considered as follows:

1. Abstract:

Key results and novelty of research should be further highlighted.

2. Introduction:

Original sources for the data in Fig.2 should be mentioned for reliability.

3. Methods:

Mathematical fundamental of the software should be briefly described.

4. Results:

The results in Figs 7–10 were from a published work. The associated discussion should highlight the contribution of the current paper.

5. Discussion:

The last paragraph in the discussion section mentioned the calibration of software (or result?) – how to do the calibration?

6. References:

Some references in Polish and should be translated into English.
